

CS132C11-2D32TC2Z6 & CS132C11-2D40TC2Z1

One- & Two-Needle Binding Operations

These versatile styles are for binding neck, arm and leg openings of bathing suits, leisure wear and underwear. The fabric edge is trimmed before binding to create a clean, uniform appearance.

Each machine is a combined two-needle coverseamer (with or without top cover thread) and a single-needle double locked stitch machine. Removing the right needle and changing the looper gauge converts the machine to single needle double locked stitch.

Styles feature disengageable fabric undertrimmer and knee-activated pneumatic TC2 tape cutter.

Replaces 34800TXX
